

COVID-19 Addendum

Schools with initial and continuous improvement review visits beginning July 1, 2021 and going forward should address the impact that COVID-19 has had on the school. Schools will be expected to include this information as a separate addendum to the final SER or CIR report.

The COVID-19 section of the report should address the following:

- Describe the impact of COVID-19 on the school to-date (e.g. enrollment, finances, faculty and staff hiring, instructional delivery, assurance of learning, etc.);
- Describe actions taken by the school to address current challenges related to COVID-19;
- Explain how the school is supporting students and faculty;
- Describe whether COVID-19 has impacted the school's ability to align with accreditation standards.

This section of the report should be 2-5 pages in length. This narrative is intended to provide contextual information to the peer review team and identify best practices in addressing the crisis.
